

# Aven Hospitality Booking Engine Cookie List

January 2026

## Technically & Strictly Necessary

The following cookies do not allow Booking Engine Services Team to identify a user personally as no personal information or data is tracked.

| Name         | Expiration | Purpose                                                                                                                                                                                                       |
|--------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| _up          | 400 days   | Flex Pay Persistence - Customer ID. Unique customer identifier to register session events.                                                                                                                    |
| AEC          | 6 months   | AEC cookies ensure that requests within a browsing session are made by the user, and not by other sites. These cookies prevent malicious sites from acting on behalf of a user without that user's knowledge. |
| apisession   | Session    | Essential to maintain state of the web application.                                                                                                                                                           |
| AWSALB       | 1 week     | This cookie provides load balancing functionality.                                                                                                                                                            |
| AWSALBCORS   | 1 week     | This cookie provides load balancing functionality.                                                                                                                                                            |
| AWSALBTG     | 1 week     | This cookie provides load balancing functionality.                                                                                                                                                            |
| AWSALBTGCORS | 1 week     | This cookie provides load balancing functionality.                                                                                                                                                            |
| GCLB         | Session    | Google Cloud Load Balancer affinity cookie. Ensures client requests for images in a session are sent to the same Google Cloud back-end server.                                                                |
| incap_ses_*  | Session    | This cookie allows the visitor's session to be maintained.                                                                                                                                                    |
| nlbi_*       | Session    | Improves performance of the web application. Web Application Load balancing cookie. To ensure requests by a client are sent to the same CDN server                                                            |
| reese84      | Persistent | Used in context with the website's BotManager. The BotManager detects, categorizes and compiles reports on potential bots trying to access the website.                                                       |
| sbeSessionID | Session    | Essential to maintain state of the web application.                                                                                                                                                           |

|                  |         |                                                                                                                                                                                                                                                                       |
|------------------|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| shoppingCartId   | 90 days | Allows the application to resume a shopping cart with stored product selection from a previous session or from the current session when the page is refreshed.                                                                                                        |
| up_br            | Session | Flex Pay Persistence - Flex Pay Application Status. Saving the Flex Pay Application Status provides a better user experience for new and returning users. By keeping a temporal persistence, the user is not asked to go through the Flex Pay application form again. |
| up_selected_term | Session | Flex Pay Persistence - Application Offer Term. This variable stores the selected offer term during the Flex Pay Application flow.                                                                                                                                     |
| visid_incap_*    | 1 year  | This cookie is from the Content Delivery Network ("CDN") and Web Application Firewall ("WAF") system. It helps Booking Engine Services Team with reliability, security and the performance of the site.                                                               |
| x-d-token        | 1 year  | Used by Imperva's Advanced Bot Protection feature. It is used by security features in Imperva that protect against bad bots scraping the booking engine and causing performance, or other problems.                                                                   |

## Analytical or Performance Cookies

| Name           | Expiration | Purpose                                                                                                                                                                                                                                                                                                                                                                    |
|----------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| _ga            | 400 days   | <p>This third-party Google Analytics cookie is used to distinguish users when collecting information about page visits.</p> <p>This cookie helps Booking Engine Services Team to identify application areas to be improved.</p> <p>This cookie does not allow Booking Engine Services Team to identify users personally as no personal information or data is tracked.</p> |
| _ga_902GY8W2RT | 400 days   | This third-party Google Analytics cookie is used by Google to monitor requests rate toward their servers.                                                                                                                                                                                                                                                                  |

|                              |         |                                                                                                                                                                                                                                                                                                                                                                                                     |
